

# FERMENTED OREGANO

KefiActive™

## Revitalizing Tonic

Raw/Unpasteurized

For Colds, Flus, and Mild Fevers

Supports a Healthy Intestinal Tract

**Bioavailable Carvacrol**

**Organic Acids**

**Enzymes**

**Beneficial Yeasts & Bacteria**

**Micronutrients**

**Zero Calories**

Botanica Fermented Oregano is prepared using an ancient unique Kefir Grain ferment. This ferment transforms the carvacrol and other significant phytochemicals in oregano into their bio-forms and also produces bioavailable beneficial organic acids, enzymes and B vitamins, thus providing the body with an effective safe form of oregano in a whole food form. This oregano tonic will be effective in the treatment of colds, flus, and mild fevers while at the same time supporting the intestinal tract. Safe for long term use.

**Botánica**
